Recommendation letter for the project ACAKORO Football

To whom it may concern

The Austrian embassy has visited the ACAKORO Football project on regular basis since its inception in 2013 and is pleased about the progress it has made since then. It has a remarkable impact on the lives of vulnerable children from Korogocho slum and the wider community.

We see the ACAKORO project as a beacon in one of the most disadvantaged areas of Nairobi and recognize that the level of empathy, self-confidence, co-operational spirit, respect and positive attitude to life among the ACAKORO children is clearly above average. Therefore, we are very confident that these upcoming role-models will have a great impact on their community.

Taking into account all of the project's activities, we can confirm that ACAKORO contributes greatly to improving living conditions and realize sustainable changes in one of the poorest and most disadvantaged areas of Kenya. We therefore believe that this is a project highly worthy of support.

Christian Fellner
Ambassador
